

Case Study #5

Deploying Electronic "Security Guards"

24 / 7 / 365 OPERATION

Unlike physical manpower, **mobilink** surveillance tripods and masts work 24 hours a day, every day of the year.

MOBILE AND PORTABLE

mobilink tripods and masts can be deployed within minutes and swiftly relocated to other high traffic or trouble spots. **mobilink** tripods can also be installed inside vehicles and left onsite for covert operations.

VISUAL DETERRENCE

mobilink tripods and masts systems provide a level of deterrence that has been proven to reduce, and in many cases, eliminate criminal activities.

WIRELESS VIDEO

When **mobilink** is fitted with wireless mesh and WiFi network hardware, securing an entire site with dozens of fixed and PTZ security cameras has never been more affordable.

BATTERY POWERED

With the optional battery pack, **mobilink** can be powered for up to 72 continuous hours, depending on load.

mobilink wireless video systems provide a significant value when used to supplement a security guard force. With the available WiFi and mesh network hardware, security guards can review live video on their WiFi enabled cell phones and PDA's.

Fitted with IP-based CCTV video cameras and IR lighting, **mobilink** can see images in total darkness. **mobilink** tripods and masts were designed to be deployed at construction sites, outdoor concert venues, parks and anywhere where people gather.

MOBILINK OPTIONS:

- Mesh or WiFi Network Access
- Fixed Position IP CCTV Cameras
- Pan/Tilt/Zoom IP CCTV Cameras
- Digital Video Recording
- FLIR Infrared Lighting
- Battery Powered
- Digital Signage
- Access Control
- Motion Detection Devices
- Intrusion Alarm Systems
- VoIP Wireless Telephone Systems
- Intercom Systems
- Sirens and Horns
- ...and many more
