

Case Study #6

Increasing Security and Safety at Construction Sites

**MOBILE AND PORTABLE**

**mobilink** tripods and masts can be deployed within minutes and easily relocated as the construction site changes.

**INCREASED SAFETY**

Employees follow safety rules and regulations more closely when they believe that they are being watched.

**SITE SECURITY**

**mobilink** tripods and masts are fitted with network based security video cameras, perimeter detection devices and wireless alarm systems. **mobilink** makes securing a construction site much easier and more affordable than ever before.

**NETWORK ACCESS**

With the available WiFi or mesh network hardware, your construction site can have a secure internet connection anywhere on site.

**BATTERY POWERED**

With the optional battery pack, **mobilink** can be powered for up to 72 continuous hours, depending on available options and load.

**mobilink** tripods and portable masts provide a multitude of functionality at construction sites. With the available WiFi or mesh network hardware, they provide a wireless network across the entire construction site. This allows project managers and engineers to access the latest CAD drawings from anywhere on the site with their WiFi notebook computers.

Fitted with network based CCTV cameras and motion detection devices, **mobilink** provides on-site, portable security 24 hours a day, 7 days a week. **mobilink** has been proven to reduce and even eliminate the need for costly guard services.

**MOBILINK OPTIONS:**

- Mesh or WiFi Network Access
- Fixed Position IP CCTV Cameras
- Pan/Tilt/Zoom IP CCTV Cameras
- Digital Video Recording
- Infrared Lighting (see in total darkness)
- Battery Powered
