

Case Study #8

Providing Security on Golf Courses During Public Events

WIRELESS VIDEO

With **mobilink's** available wireless mesh network hardware, securing an entire golf course with dozens of fixed and PTZ security cameras has never been more affordable.

NO TRENCHING

mobilink tripods and masts provide a wireless network and transmits video without the need for costly trenching. When deployed within a wireless mesh network, **mobilink** cameras can be deployed wherever they are needed, including parking lots, concessions and public galleries.

MOBILE AND PORTABLE

mobilink tripods and masts can be deployed within minutes and easily relocated to other high traffic or trouble spots.

DIGITAL SIGNAGE

With **mobilink's** optional digital signage, golf courses can offer advertising on LCD monitors. These monitors can also be used to alert the public regarding approaching bad weather, etc.

- **mobilink** wireless tripods and masts provide a multitude of functionality at golf courses. With the available WiFi and mesh network hardware, they can provide a wireless network across the entire golf course without expensive trenching.

- Fitted with network based CCTV video cameras and digital signage, **mobilink** provides revenue generating options as well by allowing you to run video clips from the premier event advertisers. The digital signage also allows you to update the public about where to park and can be used to warn them on any approaching bad weather conditions.
