

Case Study #9

Providing Safety and Security on Fairgrounds

WIRELESS VIDEO

With **mobilink's** available wireless WiFi and mesh network hardware, securing an entire state fair or county fairgrounds with dozens of fixed and PTZ security cameras has never been more affordable.

NO TRENCHING

mobilink tripods and masts provide a wireless network and transmits video without the need for costly trenching. **mobilink** tripods and masts can be deployed wherever they are needed, including parking lots, concessions and concert venues.

MOBILE AND PORTABLE

The **mobilink** tripods and masts can be deployed within minutes and easily relocated to other high traffic or trouble spots anywhere on the fairgrounds.

DIGITAL SIGNAGE

With the optional digital signage, **mobilink's** LCD monitors can also be used for mass notification to the public regarding approaching bad weather or other emergency situations.

- **mobilink** wireless video systems provide a multitude of functionality at county and state fairgrounds. With the available WiFi and mesh network hardware, they can provide a wireless network video without the need for costly trenching.

- Fitted with network based IP CCTV video cameras and digital signage, **mobilink** can also be used to provide surveillance of hard to reach public areas. **mobilink** is a proven deterrent and has been used by the Police and other emergency responders in a wide variety of security and public safety situations.
